North Jakarta, Indonesia

I am a student of the Faculty of Information Technology, majoring in Information Engineering, Yarsi University in 2021. Have skilled experience in Programming Languages such as HTML, Python, MySQL, UI/UX design, and capable of Analizing Business Process, ERP. I want to learn something new to grow together, because it is a motivation for me to try new things to develop expertise in the IT field.

Work Experiences

MSIB Studi Independent by Educourse PT Maleo Edukasi Teknologi

Feb 2024 - Jun 2024

Platform And Web Developer (Specialist Education Platform)

Studying as an independent full-stack web developer has been an exhilarating journey filled with learning and growth. From mastering the fundamentals of HTML and CSS to diving into frameworks like Bootstrap , each step brought me closer to building robust and visually appealing websites. JavaScript became my trusted companion, enabling dynamic and interactive user experiences, further enhanced by the power of jQuery and Ajax for seamless data manipulation and retrieval. Continued backend development, with Python and Django as the database

YARSI University - Artificial Intelligence

Sep 2023 - Jan 2024

Screening Cervical cancer unit technology

Creating the application of AI -based cervical cancer screening tools through the web which is used for patients, pathology doctors and hospitals, providing screening results without intermediaries from pathology
